Design & Prefabrication Services

Let our expertise and tooling boost profits and simplify your next project

aquatherm

Let us do the heavy lifting – and prefabrication.

Time is money – and nowhere is that more evident than in today's construction industry. Since plumbing and mechanical profit margins are tighter than ever, you need piping solutions that separate you from your competition. You need partners that can add value and help make your job easier.

Aquatherm polypropylene-random (PP-R) pipe systems deliver that game-changing product for commercial, institutional, industrial, government applications, and many more.

And now, as the worldwide leader in PP-R piping, we are offering our expertise and world-class fusion welding equipment to deliver custom prefabrication services. Whether it's a detailed spool, large diameter elbows, or complex manifolds, Aquatherm's dedicated and experienced Prefabrication Services team is at your service.

See for yourself!

Our experienced staff serves as an essential extension of your team, easing your workload and helping you meet deadlines by:

- Helping you compare the cost of PP-R with other pipe systems
- Assessing take-offs
- Suggesting innovative PP-R specific solutions
- Delivering mechanical room and fabrication drawings
- Supplying selective take-off services
- Quoting and building specific detailed pieces (e.g. custom-degreed fittings)
- And so much more!

Why is Aquatherm Ideal for Custom Prefabrication?

...And how can it help you?

While Aquatherm's performance characteristics in PHVAC and industrial applications make it more similar to metal than plastic, it's considerably lighter than metal and more durable and reliable than other thermoplastics. This results in an easier prefabrication process and simplified transportation to the jobsite.

A proper heat fusion connection results in a joint as strong as the pipe itself. Additionally, PP-R is incredibly sturdy, yet slightly flexible. So after Aquatherm Prefabrication Services has meticulously created your custom spool, it will be carefully shipped to your jobsite anywhere in the U.S. or Canada, typically resulting in significant material and/or labor savings.

Savings Opportunities Abound

Building owners and contractors throughout North America have reaped substantial financial, labor, logistical, and operational benefits from using these services. Facilities large and small have embraced this service as an invaluable add-on to Aquatherm's numerous benefits.

To learn more about how Aquatherm Prefabrication Services can boost your bottom line and simplify your next project, please visit www.aquatherm.com/prefab or call 801-805-6657 and ask for Prefab Services.
